

The background features a dark blue gradient with three glowing, translucent 3D torus shapes. One large torus is positioned on the left side, oriented vertically. A second smaller torus is located in the bottom right corner, also oriented vertically. A third, partially visible torus is at the bottom left edge.

Financial Risk Analytics Engine

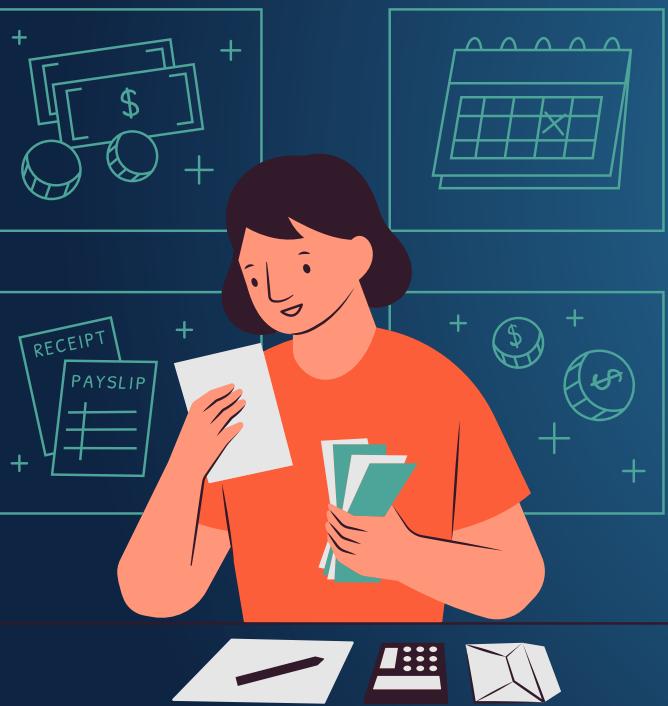

A Solution for Analysts and Financial Professionals

What?

Extract insights
from financial data

How?

Utilize SQL queries
on API and web
scraped data

Junior Data Engineer

Responsibilities:

- Participate in the construction of distributed data processing systems and data lakes, honing your skills on AWS Databricks.
- Work closely with researchers, product, and business development to identify, analyze, and operationalize novel datasets.
- Assist in crafting data pipelines and workflow orchestration to provide tailored data exports to our clients.
- Contribute to the architecture and scalability of cutting-edge machine learning systems that power Kharon's suite of data products.
- Engage in cloud-based data management projects involving data lake-houses and a variety of SQL/NoSQL/temporal and graph-based database systems.
- Assist in monitoring and maintenance of the data systems and services you help to develop.

**Key Financial
Metrics Analysis**

**Data
Visualization**

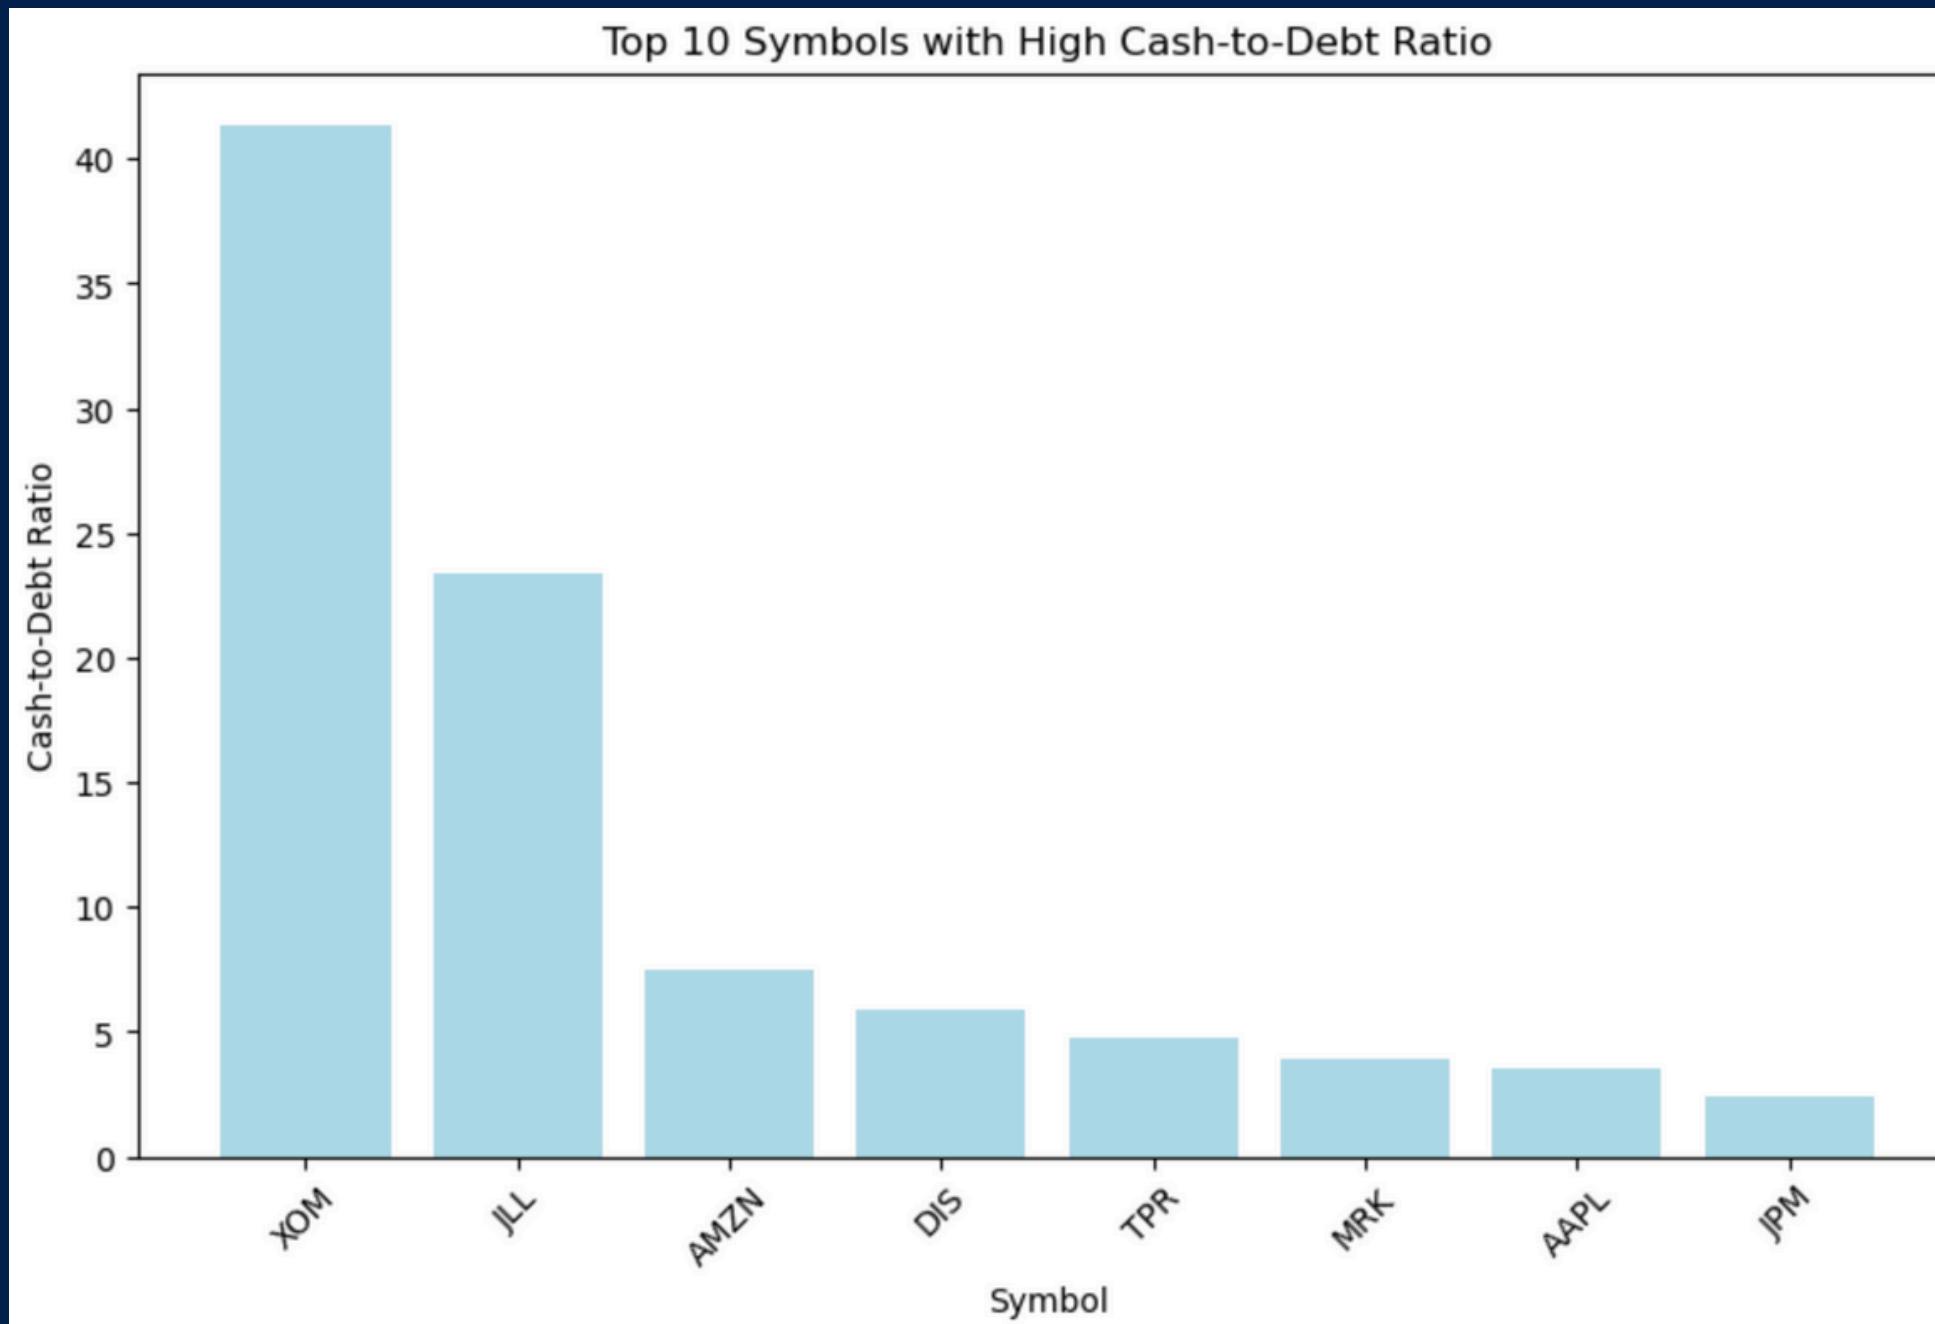

**Decision
Support**
